Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is in response to the amendment filed 11/21/2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 3, 18 and 21-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Peckover (US Patent No. 6,119,101).

As per claims 1 and 18, Peckover teaches an intelligent agents system for managing electronic commerce. Peckover teaches all the claimed invention particularly an electronic system for managing, processing and automating activity between a plurality of users. See figure 2. Peckover teaches a fixed common interface having secondary interfaces for gathering/inputting and outputting information from at least one of the plurality of users;

The secondary input interfaces operable to structure data according to a common data format and operating rule for creating, storing and transaction of data used in the system;

A clearinghouse or agent for authorizing and authenticating the users, the central clearinghouse being operable to maintain user identification records and control access for each of the plurality of users; and

A common market permitting the users employing the system to advertise and locate propositions of interest and to connect to one another using the system; and

Wherein all the users are linked to one another and the central clearinghouse and the common market by way of a virtual private network.

As per this limitation, applicant is directed to column 15, line 52 to column 23, line 63.

The claimed users are interpreted as the consumers, agents and providers of services/goods described in Peckover. The claimed clearinghouse is interpreted as the agent of Peckover. As per the claimed fixed interfaces having a plurality of secondary interfaces, the system includes a general string and a plurality of other screens or interfaces for enabling the users to perform various functions.

As per claim 2, the system of Peckover requires a user to provide profile information before using the system thus meeting the claimed limitation of claim 2. See column 18, line 30 to column 19, line 32.

As per claims 3, 21 and 22 Peckover teaches maintaining a user profile so that certain information may be automatically filed as a database object that is formatted according to the common data format and operating rule. See column 21, lines 14-63.

Peckover uses a plurality of linked databases having indexes wherein information from one table or database is retrieved and displayed to a user. See also column 19, lines 18-32.

3. The prior art taken alone or in combination failed to teach or suggest "wherein the who/what, why/how and where/when information is input to the system through the secondary interface in a manner that conforms the common database objects to the common data format and operating rule such that why information + how information = where/when information as recited in claim 19.
